PROGRAMME OVERVIEW

Build Practical Skills for Public Health Leadership & Administration

Practical | Job-Oriented | Epidemiology | Biostatistics | Surveillance | National Programmes | Health Education | AI Literacy

Public health works at the scale where individual treatment stops being the answer. Its questions are different: who is getting ill, where, why now, what intervention reaches the most people for the least money, and how do we know it worked.

The GIHS Public Health Administration programme covers the historical background and concepts of health and disease, social services, epidemiological methods and their uses, planning and conduct of epidemiological studies, surveillance and epidemic preparedness, outbreak investigation and disease screening, biostatistics and health information systems, demography, health administration and planning, national health programmes, hospital management and pharmacy, epidemiology of communicable and non-communicable disease, occupational and environmental health, nutrition, MCH and family welfare, mental health, genetics, international health and regulation, public health laws, health education, voluntary agencies and NGOs, entomology and parasitology, microbiology, disinfection, public health chemistry and public health laboratory service — together with the applied skills of survey design, immunisation campaigns, IEC strategy and outbreak fieldwork.

> **"We Teach What the Job Requires."**
>
> GIHS teaches how public health services are planned, managed, monitored and evaluated — prevention, promotion, surveillance, programmes, outbreak preparedness, policy implementation and the effective use of scarce healthcare resources.

Why This Programme Stands Out

- Epidemiological methods, study design and disease screening
- Surveillance, epidemic preparedness and outbreak investigation
- Biostatistics, demography and health information systems
- Health administration, health planning and national health programmes
- Epidemiology of communicable and non-communicable disease
- Occupational health, environmental health and nutrition
- MCH, family welfare, mental health and genetics
- International health and regulation, and public health laws
- Health education, IEC strategy and community mobilisation
- Entomology, parasitology, microbiology and public health laboratory service
- NEW dedicated AI module for public health and population health management

REVISED SYLLABUS

Curriculum, Module by Module

The full GIHS syllabus, regrouped into 9 clearly sequenced modules so you can see exactly what each stage of the programme teaches and why it comes where it does. Module 9 is the new Artificial Intelligence module.

MODULE 01 Foundations of Public Health

How the field developed, what it means by health and disease, and its social base.

- Historical background and concepts of health and disease
- Social services in public health
- Demography — basic principles, population growth and indices of fertility

MODULE 02 Epidemiological Methods & Study Design

The core analytical method: designing a study that can answer the question.

- Principles of epidemiological methods and their uses
- Epidemiological methods with reference to healthcare delivery
- Planning and conduct of epidemiological studies
- Disease screening
- Organising and conducting surveys as part of programme evaluation

MODULE 03 Surveillance, Outbreaks & Epidemic Preparedness

Seeing the outbreak early, investigating it properly and acting on the data.

- Epidemiologic surveillance and epidemic preparedness
- Investigation of an epidemic
- Carrying out investigation of outbreaks
- Interpretation and utilisation of surveillance data for prevention and management

MODULE 04 Biostatistics & Health Information Systems

The numbers behind every public-health claim.

- Biostatistics
- Hospital and health information systems
- Acquiring skills to use the computer as an aid to routine functions

MODULE 05 Health Administration, Planning & National Programmes

Turning evidence into a funded, staffed, evaluated programme.

- Health administration and health planning management
- National health programmes — implementation and evaluation
- Hospital management and hospital pharmacy
- Organising and conducting health-care service campaigns such as national immunisation days

MODULE 06

Disease Epidemiology & Population Health

The disease burden itself, across communicable, non-communicable and life-stage domains.

- Epidemiology of communicable and non-communicable disease
- Occupational health, environmental health and nutrition
- MCH, family welfare and mental health
- Genetics and heredity
- Acquiring clinical skills at generalist level for common health problems and MCH

MODULE 07

Laboratory, Vector & Environmental Services

The technical services that make surveillance and prevention possible.

- Entomology and parasitology — vectors and parasites of public health importance
- Microbiology — diagnostic and screening tests, specimen collection and transport
- Disinfection procedures and public health chemistry
- Public health laboratory service
- Identification of vector species and use of water-quality analysis kits

MODULE 08

Law, International Health & Health Education

The legal framework, the global context, and how prevention is actually communicated.

- Public health laws
- International health and regulation
- Health education, communication process and methods
- Planning and organisation of health education activities
- Voluntary health agencies and NGOs
- Formulation of strategies and organisation of IEC activities from district to periphery

MODULE 09 · NEW

Artificial Intelligence in Public Health & Population Health Management

Surveillance Analytics · Outbreak Intelligence · Programme Evaluation · Responsible AI

- AI fundamentals for public-health professionals and administrators
- AI-assisted epidemiological trend analysis and disease-surveillance concepts
- AI support for outbreak intelligence, early warning and risk mapping
- … and 12 further topics — the full module is set out on page 5

The Programme at a Glance

9
Modules, including the new AI module

3 / 4 / 12
Months — Certificate, Fast Track or PG Diploma

100%
Online & distance, study at your own pace

Lifetime
Free personal expert assigned to you

MCQ + Project
Online exam plus a 30-page project

2
International certificates awarded and shipped

Every module is backed by a personal subject expert assigned to you for life at no cost — email or call whenever a topic needs explaining, and a session can be arranged around your queries.

MODULE 09 · NEW HIGHLIGHT MODULE

Artificial Intelligence in Public Health & Population Health Management

Surveillance Analytics · Outbreak Intelligence · Programme Evaluation · Responsible AI

This dedicated module introduces practical and responsible applications of Artificial Intelligence, Machine Learning and Generative AI relevant to this field. It focuses on how AI can support professional efficiency, analysis, documentation and decision support while human oversight, confidentiality, data integrity, ethical practice and applicable organisational or regulatory requirements are maintained.

Key Topics Covered

- AI fundamentals for public-health professionals and administrators
- AI-assisted epidemiological trend analysis and disease-surveillance concepts
- AI support for outbreak intelligence, early warning and risk mapping
- AI-assisted population-health data analysis and health-indicator interpretation
- AI for programme planning, resource allocation and intervention prioritisation
- AI support for public-health communication and health-education content
- AI-assisted monitoring and evaluation of public-health programmes
- AI in environmental, occupational and community-health data analysis
- AI-assisted survey design, sampling and data-quality checking
- AI for immunisation coverage and campaign-performance analytics
- AI support for vector, environmental and laboratory surveillance data
- Generative AI for IEC material, reports and stakeholder briefings
- Prompt engineering for public-health professionals
- Data privacy, fairness, bias and responsible use of population-health data
- Human oversight, validation and ethical AI governance in public health

THE RESPONSIBLE BOUNDARY

Anyone can generate an answer with AI. The professional skill — and the one employers are now paying for — is knowing how to find what the AI got wrong.

AI is an assistive capability, not an authority. Learners are trained to verify AI-generated output against source data, protect confidential patient and organisational information, recognise hallucinations and bias, and use only approved or validated tools where procedures or regulations require it. Accountable decisions remain with qualified people.

What This Module Adds to Your Career

Healthcare management runs on information that nobody has time to analyse properly — indicators, incidents, complaints, utilisation, staffing, spend. AI changes that arithmetic, turning retrospective reporting into something closer to early warning, and turning documentation work from days into hours. The competency this module treats as central is verification: AI produces confident, well-formatted and sometimes entirely wrong answers, and in a healthcare organisation that lands on a patient, a regulator or a balance sheet.

AI-Enhanced Practice Exercises

Applied work that builds the verification habit, not just the prompting habit:

- Analyse mock surveillance data and identify an emerging signal
- Design a survey and test its sampling logic
- Build a programme monitoring and evaluation framework
- Prepare IEC material and verify every health claim in it
- Review an AI-generated epidemiological summary for unsupported conclusions

HOW YOU STUDY & WHERE IT TAKES YOU

Study Method, Certification, Skills & Career Pathways

Study Methodology

- Freelance, self-paced method of study around your work schedule.
- Study the books and course material provided with your enrollment.
- Note down your queries as you progress through each module.
- Contact your assigned expert by email or phone at any time.
- Experts respond by mail, by call, or arrange a session based on your queries.
- Lifetime expert support to keep raising your knowledge and expertise.
- All content is based on live cases and industry best practice.

Mode of Examination

- Login details for the online examination are issued on completion of the programme duration.
- A 7-day window is given to appear for the online examination.
- The examination pattern is Multiple Choice Questions (MCQ).
- A PowerPoint project of minimum 30 pages on a topic of your own choice.
- Successful candidates are awarded two certifications (Degree and Transcriptional Degree).

Learning Mode, Assessment & Certification

Mode	Online and distance learning, designed for working professionals.
Assessment	Online and distance examinations (MCQ / theoretical) and/or projects.
Certification	GIHS certificate awarded to successful candidates on completion of applicable requirements.
Career support	Placement support and CV-forwarding assistance for successful candidates.
Verification	Employers can confirm certificate authenticity through the official GIHS verification process.

Verified by GIHS itself — not by a third party. Every certificate carries its own certificate ID. An employer, university or registration body can confirm it directly at www.gihsonline.com/verify-certification — no third-party verification agency and no fee.

Practical & Job-Oriented Learning

Learning is positioned around what the job actually asks for: departmental planning, service coordination, quality indicators and accreditation evidence, workforce and roster planning, budgets and utilisation, procurement and maintenance, information systems, documentation, audit preparation and management reporting — together with the AI-assisted versions of the same tasks, always finishing with the verification step.

Career-Relevant Skills You Will Develop

- Epidemiological method and study design
- Surveillance and outbreak investigation
- Biostatistics and demography
- Health planning and programme management
- National health programme implementation and evaluation
- Communicable and non-communicable disease epidemiology
- MCH, nutrition, occupational and environmental health
- Public health law and international regulation
- Health education, IEC and community mobilisation
- AI-assisted population-health analytics

Career & Professional Pathways

The current GIHS course page lists **Public Health Administrator, programme manager and consultant pathways**. The programme can also support:

- Public Health Administrator
- Public Health Programme Manager
- Senior Programme Manager — public health and NGO
- Public Health Consultant
- Public Health Programme Coordinator
- Community health programme roles
- Health programme monitoring and evaluation
- Public health project coordination
- NGO and development-sector health programmes

Career eligibility, designation and seniority depend on your existing qualification, professional experience, employer requirements and any applicable statutory or regulatory criteria. Clinical public-health appointments may require a medical qualification.

PLACEMENT & CAREER ENHANCEMENT

What GIHS Does for Your Career After the Course

CAREER ENHANCEMENT INCLUDED FREE WITH EVERY ENROLMENT

Exclusive FREE CV & Interview Coaching — worth ₹9,999

FREE
worth ₹9,999

Join a GIHS programme now and unlock complimentary access to TopCV Coach, giving you the professional resume and interview skills you need to launch your career with confidence. Your profile is also posted on the TopCV Coach website, where a large recruiter and employer network is active.

Professional resume building
Build a CV that reads the way recruiters in healthcare actually screen.

Interview skills coaching
Practise and sharpen how you present your qualification and your new AI literacy.

Profile posted on TopCV
Your profile goes live on topcvcoach.com, in front of a large employer network.

No extra cost
Worth ₹9,999, included free with your GIHS enrolment.

TopCV Interview — Delivered with **www.topcvcoach.com** · included free with every GIHS programme enrolment

Where Our Graduates Are Making an Impact

Healthcare management skill is portable — GIHS learners work across hospitals, diagnostics, insurance, pharmaceuticals, public health, technology and consulting, and a good number build their own practices.

Hospitals & hospital groups
Administration, operations, quality and planning

Diagnostic chains & laboratories
Operations, accreditation and multi-site work

Health insurance & TPAs
Claims, pre-authorisation and network coordination

Pharmaceutical & device companies
Commercial, regulatory and quality functions

Public health systems
Programme management, monitoring and evaluation

NGOs & development programmes
Project delivery, funding reports and field coordination

Healthcare IT & health-tech
Information systems, records and digital health projects

Consulting & accreditation
NABH and JCI readiness, audits and process improvement

Independent practice & ventures
Advisory, training, documentation and project services

WORKING GLOBALLY — India · UK · USA · Canada · Australia · New Zealand · UAE & Gulf · Saudi Arabia · Qatar · Oman · Russia · Germany · Ireland · Singapore · Malaysia · Africa · Europe

Placement support. More than 2,000 GIHS professionals are now working in well-known organisations worldwide, many of them after building CV and interview skills through the free TopCV Coach programme. GIHS shares your profile globally for career growth. Successful candidates receive placement support and their CVs may be forwarded to various organisations. Final employment remains subject to employer selection and role-specific eligibility.

Business & Entrepreneurship Value

Public health programmes run through NGOs, foundations, government schemes and CSR budgets, and all of them commission design, monitoring and evaluation work.

- Provide public health programme design and implementation support
- Offer monitoring, evaluation and impact-assessment services
- Build surveillance, survey and data-analysis capability for programmes
- Develop IEC, health education and community mobilisation material
- Support CSR and NGO health initiatives and grant reporting

Any regulated clinical service must only be provided within your lawful professional scope and applicable registration requirements. Career titles, eligibility and the right to practise depend on your prior qualification, experience, employer criteria and local regulation.

Global Institute Of Health Science

Certificate

OF POST GRADUATE DIPLOMA

This is to certify that

CANDIDATE NAME

has successfully completed the one year programme of **Post Graduate Diploma in Public Health Administration** offered by Global Institute of Health Science, during **MONTH YEAR to MONTH YEAR**. Upon successful completion of the programme

POST GRADUATE DIPLOMA

IN

PUBLIC HEALTH ADMINISTRATION

is awarded to him/her this day the **XX MONTH YEAR**.

What Our Candidates Say

★★★★★ 300+ Google reviews

"I recently completed my Post Graduation in Pregnancy and Child Care from GIHS and it was a wonderful experience."
Dr Fatema Ebrahim

"One of the best institutions... Course is carefully structured and detailed. Management is very well organised and prompt in assistance."
A V

"This course has been a game-changer for me, providing the knowledge and skills necessary to succeed on a global platform."
Akram Sabiq

"They have a very good independent study methodology and the subject matter is really good... the Institute of Health was a wise choice."
Andrea Del Pilar

"From the day 1 to till date Chethan assisted very well... the studies are very detailed and made interesting."
Sarah Lilly, MBA

Admission Procedure START ANY DAY

1. **Apply online — any day**
   Enrol at www.gihsonline.com / Apply Online. Admissions stay open all year — no batch to wait for.
2. **Confirm your fee**
   No hidden charges. Payment within 7 days of enrollment.
3. **Receive your study material**
   Online access within 48 hours; printed books shipped if you add them.
4. **Get your personal expert**
   A professional subject expert is assigned to you for lifetime support at no cost.
5. **Complete exam and project**
   Online examination plus a project submission.
6. **Receive your certificates**
   Two international certificates are awarded and shipped.

Who Can Enrol

LISTED ON THE GIHS COURSE PAGE

- All graduates and postgraduates
- MBBS / BDS / BHMS / BAMS / BPT / BUMS
- B.Pharm / M.Pharm / Pharmacy Professionals
- B.Sc. / M.Sc. & Life-Science Graduates
- Nursing Professionals
- Medical Laboratory Professionals
- Medical IT Professionals
- Microbiology Professionals
- Biomedical / Biotechnology Professionals
- Hospital and healthcare administrators
- Professionals working with hospitals & healthcare organisations

ALSO OPEN TO

- Any graduate from any discipline
- Working professionals with relevant work experience
- Entrepreneurs planning to start a healthcare or allied venture
- Managers and administrators running a healthcare organisation

Any graduate, and any professional with relevant work experience, may enrol — including those who intend to start, run or manage a healthcare or allied organisation.

QUESTIONS

Frequently Asked Questions

What does the programme cover?

Concepts of health and disease, epidemiological methods and study design, surveillance and epidemic preparedness, outbreak investigation, screening, biostatistics, demography, health administration and planning, national health programmes, communicable and non-communicable disease epidemiology, occupational and environmental health, nutrition, MCH, mental health, genetics, international health, public health law, health education, entomology, microbiology and public health laboratory service.

Does it cover epidemiology properly?

Yes — principles and uses of epidemiological methods, planning and conduct of studies, screening, surveillance, epidemic investigation and disease-specific epidemiology.

Does it cover biostatistics?

Yes, together with hospital and health information systems and the computer skills the routine work needs.

Does it cover national health programmes?

Yes — implementation and evaluation, plus organising campaigns such as national immunisation days.

How is AI used in public health?

Surveillance trend analysis, outbreak early warning and risk mapping, population-health data analysis, programme prioritisation, monitoring and evaluation, and health-education content — with careful attention to fairness and data privacy.

Can AI declare an outbreak?

No. It can surface a signal faster than manual review. Confirming and declaring an outbreak is a public-health authority's decision.

Who should enrol?

Healthcare professionals, science graduates, NGO and development-sector staff, and anyone moving into public health systems, community health or health programme management.

Can working professionals enrol?

Yes. The programme is delivered online and by distance learning, with a Fast-Track option.

What is included in the programme fee?

Course material with the latest updates, online access within 48 hours, printed books shipped with your enrolment, a personal subject expert for life at no cost, the online examination and project assessment, and two international certificates on successful completion. There are no hidden charges.

Is the TopCV Coach access really free?

Yes. Every GIHS enrolment now includes complimentary TopCV Coach access worth ₹9,999 for professional resume building and interview skills, and your profile is posted on the TopCV website where a large recruiter network is active.

Can I use this programme to start my own practice or venture?

Yes, within your lawful professional scope. The Business & Entrepreneurship section of this brochure sets out the non-clinical services, education and consulting work the knowledge supports. Regulated clinical services require the appropriate qualification and authorisation.

I am not from a clinical background. Can I still enrol?

Yes. Any graduate from any discipline may enrol, as can working professionals with relevant experience, entrepreneurs and managers of healthcare or allied organisations.

No batch to wait for — start the day you enrol Admissions stay open every day of the year — enrol today and begin at once.

ABOUT THE INSTITUTE

Global Institute of Health Science

Global Institute of Health Science is a pioneer in health science education, especially in distance and online learning, with more than 15 years of experience and international exposure. GIHS is an ISO 21001:2018 certified health science institute, globally acclaimed, and certified with copyright approval from IPR, Government of India. GIHS also holds international certification from UASL UK for its Quality Control Management System.

- **Excellence for health professionals** — Programmes built around what healthcare employers actually ask for.
- **15+ years with international exposure** — A student and professional base across India, UK, USA, Canada, UAE, Russia and Australia.
- **ISO certified and government approved** — ISO 21001:2018, IPR Government of India copyright approval and UASL UK quality certification.
- **Lifetime free personalised tutoring** — A dedicated subject expert assigned to you at no cost, for life.

More Ways to Build Your Career

GIHS programmes help professionals get a strong start in the healthcare field. These courses are ad-hoc to a professional career and provide the additional benefit of being part of a global learning organisation.

Health Management Programs

- Health Informatics
- Hospital Administration
- Pharma Management
- Hospital Planning & Management
- Medical Transcription
- Nursing Management
- Public Health Administration
