PROGRAMME OVERVIEW

Build Practical Skills in Hospital Infection Control & Patient Safety

Practical | Job-Oriented | Surveillance | Sterilisation | AMR | CSSD | NABH & JCI | AI Literacy

Healthcare-associated infection is the most preventable harm in any hospital and the hardest to eliminate, because it is produced by hundreds of small routine acts — a hand not washed, a line not dated, an instrument released early, a waste bag in the wrong bin. Infection control is the discipline of making those acts reliable.

The GIHS Hospital Infection Control & Patient Safety programme covers the healthcare and hospital-management context, the role and function of the Infection Control Nurse, the history and organisation of infection control, routes of transmission and their prevention, programme organisation and surveillance, needle-stick injury and post-exposure prophylaxis, sterilisation and disinfection, PPE and standard precautions, isolation protocols, biomedical waste management, CSSD, laundry, kitchen and housekeeping, device-associated infections, antimicrobial resistance, vaccination, blood spill, hand hygiene and environmental surveillance.

> **"We Teach What the Job Requires."**
>
> GIHS teaches infection control as an operational programme — surveillance, protocols, training, audit and evidence — rather than as a set of guidelines to be filed.

Why This Programme Stands Out

- Complete hospital infection-control programme from organisation to surveillance
- Role and function of the Infection Control Nurse
- Routes of transmission and their prevention
- Infection-control programme organisation and surveillance
- Needle-stick injury and post-exposure prophylaxis
- Sterilisation, disinfection, CSSD, laundry, kitchen and housekeeping
- PPE, standard precautions and isolation protocols
- Device-associated infections and antimicrobial resistance
- Biomedical waste management, blood spill and hand hygiene
- Vaccination and environmental surveillance
- NEW dedicated AI module for surveillance and patient-safety analytics

REVISED SYLLABUS

Curriculum, Module by Module

The full GIHS syllabus, regrouped into 8 clearly sequenced modules so you can see exactly what each stage of the programme teaches and why it comes where it does. Module 8 is the new Artificial Intelligence module.

MODULE 01 Healthcare & Hospital Management Context

The organisation infection control has to work inside, and the role that leads it.

- Introduction to healthcare
- Principles of management, the healthcare industry and hospital administration
- The hospital as an organisation
- Role and function of the Infection Control Nurse
- Hospital planning
- Management of clinical and supportive services

MODULE 02 Foundations of Hospital Infection Control

How the discipline developed, and how a programme is actually structured.

- Historical journey of hospital infection control
- Organisation of hospital infection control
- Infection control programme organisation
- Routes of transmission and their prevention

MODULE 03 Surveillance & Environmental Monitoring

You cannot control what you are not measuring — and measuring it correctly is the skill.

- Surveillance
- Environmental surveillance
- Device-associated infections

MODULE 04 Standard Precautions, PPE & Isolation

The daily practices that prevent transmission, and the protocols that contain it.

- Personal protective equipment and standard precautions
- Isolation protocols
- Hand hygiene
- Blood spill management

MODULE 05 Sterilisation, Disinfection & CSSD

The reprocessing chain — where a single shortcut contaminates everything downstream.

- Sterilisation and disinfection
- Central Sterile Services Department (CSSD)
- Laundry, kitchen and housekeeping

MODULE 06 Occupational Exposure, AMR & Vaccination

Protecting staff, and protecting the antibiotics that everything else depends on.

- Needle-stick injury and post-exposure prophylaxis
- Antimicrobial resistance (AMR)
- Vaccination

MODULE 07 Waste Management, Quality & Accreditation

Disposal, evidence and the standards the programme is inspected against.

- Biomedical waste management
- Quality management — NABH and JCI

MODULE 08 · NEW Artificial Intelligence in Infection Control & Patient Safety

Surveillance Analytics · Outbreak Detection · Audit Readiness · Responsible AI

- AI fundamentals for infection-control and patient-safety professionals
- AI-assisted surveillance data collection, classification and trend analysis
- AI support for early detection of clusters and possible outbreaks
- … and 12 further topics — the full module is set out on page 5

The Programme at a Glance

8
Modules, including the new AI module

3 / 4 / 12
Months — Certificate, Fast Track or PG Diploma

100%
Online & distance, study at your own pace

Lifetime
Free personal expert assigned to you

MCQ + Project
Online exam plus a 30-page project

2
International certificates awarded and shipped

Every module is backed by a personal subject expert assigned to you for life at no cost — email or call whenever a topic needs explaining, and a session can be arranged around your queries.

MODULE 08 · NEW HIGHLIGHT MODULE

Artificial Intelligence in Infection Control & Patient Safety

Surveillance Analytics · Outbreak Detection · Audit Readiness · Responsible AI

This dedicated module introduces practical and responsible applications of Artificial Intelligence, Machine Learning and Generative AI relevant to this field. It focuses on how AI can support professional efficiency, analysis, documentation and decision support while human oversight, confidentiality, data integrity, ethical practice and applicable organisational or regulatory requirements are maintained.

Key Topics Covered

- AI fundamentals for infection-control and patient-safety professionals
- AI-assisted surveillance data collection, classification and trend analysis
- AI support for early detection of clusters and possible outbreaks
- AI-assisted device-associated infection rate monitoring
- AI for antimicrobial resistance pattern and antibiogram trend review
- AI-assisted hand-hygiene audit data analysis and compliance trending
- AI support for environmental surveillance and sampling-schedule planning
- AI-assisted sterilisation, CSSD and reprocessing record review
- AI for needle-stick and occupational-exposure incident trend analysis
- AI-assisted biomedical-waste segregation audit and compliance tracking
- AI support for NABH and JCI evidence organisation and audit readiness
- Generative AI for protocols, training material and staff communication
- Prompt engineering for infection-control professionals
- Privacy, data integrity, bias, validation and traceability in surveillance AI
- Human oversight — AI does not diagnose infection or determine clinical management

THE RESPONSIBLE BOUNDARY

Anyone can generate an answer with AI. The professional skill — and the one employers are now paying for — is knowing how to find what the AI got wrong.

AI is an assistive capability, not an authority. Learners are trained to verify AI-generated output against source data, protect confidential patient and organisational information, recognise hallucinations and bias, and use only approved or validated tools where procedures or regulations require it. Accountable decisions remain with qualified people.

What This Module Adds to Your Career

Healthcare management runs on information that nobody has time to analyse properly — indicators, incidents, complaints, utilisation, staffing, spend. AI changes that arithmetic, turning retrospective reporting into something closer to early warning, and turning documentation work from days into hours. The competency this module treats as central is verification: AI produces confident, well-formatted and sometimes entirely wrong answers, and in a healthcare organisation that lands on a patient, a regulator or a balance sheet.

AI-Enhanced Practice Exercises

Applied work that builds the verification habit, not just the prompting habit:

- Analyse mock surveillance data and identify a possible cluster
- Build a hand-hygiene compliance trend dashboard concept
- Prepare an environmental surveillance sampling schedule
- Create an NABH infection-control evidence checklist
- Review an AI-generated infection-control protocol and verify every clinical claim

HOW YOU STUDY & WHERE IT TAKES YOU

Study Method, Certification, Skills & Career Pathways

Study Methodology

- Freelance, self-paced method of study around your work schedule.
- Study the books and course material provided with your enrollment.
- Note down your queries as you progress through each module.
- Contact your assigned expert by email or phone at any time.
- Experts respond by mail, by call, or arrange a session based on your queries.
- Lifetime expert support to keep raising your knowledge and expertise.
- All content is based on live cases and industry best practice.

Mode of Examination

- Login details for the online examination are issued on completion of the programme duration.
- A 7-day window is given to appear for the online examination.
- The examination pattern is Multiple Choice Questions (MCQ).
- A PowerPoint project of minimum 30 pages on a topic of your own choice.
- Successful candidates are awarded two certifications (Degree and Transcriptional Degree).

Learning Mode, Assessment & Certification

Mode	Online and distance learning, designed for working professionals.
Assessment	Online and distance examinations (MCQ / theoretical) and/or projects.
Certification	GIHS certificate awarded to successful candidates on completion of applicable requirements.
Career support	Placement support and CV-forwarding assistance for successful candidates.
Verification	Employers can confirm certificate authenticity through the official GIHS verification process.

Verified by GIHS itself — not by a third party. Every certificate carries its own certificate ID. An employer, university or registration body can confirm it directly at www.gihsonline.com/verify-certification — no third-party verification agency and no fee.

Practical & Job-Oriented Learning

Learning is positioned around what the job actually asks for: departmental planning, service coordination, quality indicators and accreditation evidence, workforce and roster planning, budgets and utilisation, procurement and maintenance, information systems, documentation, audit preparation and management reporting — together with the AI-assisted versions of the same tasks, always finishing with the verification step.

Career-Relevant Skills You Will Develop

- Infection-control programme organisation
- Surveillance and outbreak recognition
- Transmission routes and prevention
- Standard precautions, PPE and isolation
- Sterilisation, disinfection and CSSD
- Biomedical waste management
- Occupational exposure and post-exposure prophylaxis
- Antimicrobial resistance awareness
- NABH and JCI accreditation evidence
- Patient safety and quality improvement
- AI-assisted surveillance analytics

Career & Professional Pathways

The current GIHS course page lists **Infection control coordination, patient safety and quality pathways**. The programme can also support:

- Infection Control Nurse / Infection Control Coordinator
- Hospital infection-control programme support
- Patient safety and quality roles
- NABH and JCI accreditation coordination
- CSSD and sterilisation services coordination
- Biomedical waste and environmental compliance support
- Healthcare quality and audit support
- Occupational health and staff-safety coordination

Infection Control Nurse and other clinically accountable roles normally require a nursing or relevant clinical qualification and professional registration. This programme develops the programme-management, surveillance and quality competencies those roles use, and complements rather than replaces the underlying qualification.

PLACEMENT & CAREER ENHANCEMENT

What GIHS Does for Your Career After the Course

CAREER ENHANCEMENT INCLUDED FREE WITH EVERY ENROLMENT

Exclusive FREE CV & Interview Coaching — worth ₹9,999

FREE
worth ₹9,999

Join a GIHS programme now and unlock complimentary access to TopCV Coach, giving you the professional resume and interview skills you need to launch your career with confidence. Your profile is also posted on the TopCV Coach website, where a large recruiter and employer network is active.

Professional resume building
Build a CV that reads the way recruiters in healthcare actually screen.

Interview skills coaching
Practise and sharpen how you present your qualification and your new AI literacy.

Profile posted on TopCV
Your profile goes live on topcvcoach.com, in front of a large employer network.

No extra cost
Worth ₹9,999, included free with your GIHS enrolment.

TopCV Interview — Delivered with **www.topcvcoach.com** · included free with every GIHS programme enrolment

Where Our Graduates Are Making an Impact

Healthcare management skill is portable — GIHS learners work across hospitals, diagnostics, insurance, pharmaceuticals, public health, technology and consulting, and a good number build their own practices.

Hospitals & hospital groups
Administration, operations, quality and planning

Diagnostic chains & laboratories
Operations, accreditation and multi-site work

Health insurance & TPAs
Claims, pre-authorisation and network coordination

Pharmaceutical & device companies
Commercial, regulatory and quality functions

Public health systems
Programme management, monitoring and evaluation

NGOs & development programmes
Project delivery, funding reports and field coordination

Healthcare IT & health-tech
Information systems, records and digital health projects

Consulting & accreditation
NABH and JCI readiness, audits and process improvement

Independent practice & ventures
Advisory, training, documentation and project services

WORKING GLOBALLY — India · UK · USA · Canada · Australia · New Zealand · UAE & Gulf · Saudi Arabia · Qatar · Oman · Russia · Germany · Ireland · Singapore · Malaysia · Africa · Europe

Placement support. More than 2,000 GIHS professionals are now working in well-known organisations worldwide, many of them after building CV and interview skills through the free TopCV Coach programme. GIHS shares your profile globally for career growth. Successful candidates receive placement support and their CVs may be forwarded to various organisations. Final employment remains subject to employer selection and role-specific eligibility.

Business & Entrepreneurship Value

Infection control is inspected in every accreditation cycle and staffed thinly almost everywhere, which makes external programme support a recurring need.

- Provide infection-control programme set-up and audit services
- Support NABH and JCI infection-control evidence and readiness
- Offer surveillance system design and data-analysis support
- Deliver hand hygiene, PPE and biomedical-waste training
- Provide CSSD and reprocessing process-improvement consulting

Any regulated clinical service must only be provided within your lawful professional scope and applicable registration requirements. Career titles, eligibility and the right to practise depend on your prior qualification, experience, employer criteria and local regulation.

ENROLMENT

Three Flexible Learning Options

Programme	Duration	Indian Fee	International	Positioning
Certificate Program	3 Months	**₹22,999**	**450 USD**	Basic foundation programme — core knowledge first
Post Graduate Diploma Program	1 Year	**₹32,999**	**699 USD**	Advanced and career-oriented — full depth at a steady pace
Fast Track PG Diploma Program MOST CHOSEN	4 Months	**₹36,999**	**750 USD**	Same advanced syllabus — flexible, finish at your own pace

Both advanced options carry the same career-oriented syllabus and the same two international certificates. The Fast Track is simply flexible — finish as quickly as your own pace allows and step into a fast-growing job market sooner. The Certificate Program is the basic, foundation-level option.

Printed books are optional
Online study material is included with every enrolment. Add the printed books at enrolment if you would like them shipped.

₹2,999 additional (India) | **99 USD** additional (International)

EMI available on credit cards Convert your fee into easy monthly instalments — ask admissions when you enrol.

All modes of payment are available. Fees may be subject to applicable taxes, exchange rates or future revision.

What Our Candidates Say

★★★★★ 300+ Google reviews

"I recently completed my Post Graduation in Pregnancy and Child Care from GIHS and it was a wonderful experience."
Dr Fatema Ebrahim

"One of the best institutions... Course is carefully structured and detailed. Management is very well organised and prompt in assistance."
A V

"This course has been a game-changer for me, providing the knowledge and skills necessary to succeed on a global platform."
Akram Sabiq

"They have a very good independent study methodology and the subject matter is really good... the Institute of Health was a wise choice."
Andrea Del Pilar

"From the day 1 to till date Chethan assisted very well... the studies are very detailed and made interesting."
Sarah Lilly, MBA

Admission Procedure START ANY DAY

1. **Apply online — any day**
   Enrol at www.gihsonline.com / Apply Online. Admissions stay open all year — no batch to wait for.
2. **Confirm your fee**
   No hidden charges. Payment within 7 days of enrollment.
3. **Receive your study material**
   Online access within 48 hours; printed books shipped if you add them.
4. **Get your personal expert**
   A professional subject expert is assigned to you for lifetime support at no cost.
5. **Complete exam and project**
   Online examination plus a project submission.
6. **Receive your certificates**
   Two international certificates are awarded and shipped.

Who Can Enrol

LISTED ON THE GIHS COURSE PAGE

- All graduates and postgraduates
- MBBS / BDS / BHMS / BAMS / BPT / BUMS
- B.Pharm / M.Pharm / Pharmacy Professionals
- B.Sc. / M.Sc. & Life-Science Graduates
- Nursing Professionals
- Medical Laboratory Professionals
- Medical IT Professionals
- Microbiology Professionals
- Biomedical / Biotechnology Professionals
- Hospital and healthcare administrators
- Professionals working with hospitals & healthcare organisations

ALSO OPEN TO

- Any graduate from any discipline
- Working professionals with relevant work experience
- Entrepreneurs planning to start a healthcare or allied venture
- Managers and administrators running a healthcare organisation

Any graduate, and any professional with relevant work experience, may enrol — including those who intend to start, run or manage a healthcare or allied organisation.

QUESTIONS

Frequently Asked Questions

What does the programme cover?

Infection-control organisation and programme structure, transmission routes, surveillance, needle-stick injury and PEP, sterilisation and disinfection, PPE and isolation, biomedical waste, CSSD, laundry and housekeeping, device-associated infections, AMR, vaccination, blood spill, hand hygiene and environmental surveillance.

Does it cover CSSD?

Yes — the Central Sterile Services Department, along with sterilisation and disinfection and the laundry, kitchen and housekeeping interfaces.

Does it cover antimicrobial resistance?

Yes, as a dedicated syllabus area, with antibiogram and resistance-pattern review in the AI module.

Does it cover NABH and JCI?

Yes — quality management under NABH and JCI, which is where most infection-control evidence is inspected.

How is AI used in infection control?

Surveillance trend analysis, cluster and outbreak signal detection, hand-hygiene compliance trending, device-infection monitoring, waste-audit tracking and evidence organisation — never diagnosis.

Can AI detect an outbreak?

It can raise a signal from surveillance data earlier than manual review typically would. Confirming it, and deciding what to do, is a clinical and public-health judgement.

Who should enrol?

Nurses, clinicians, microbiology and laboratory professionals, quality staff and hospital administrators responsible for infection control or patient safety.

Can working professionals enrol?

Yes. The programme is delivered online and by distance learning, with a Fast-Track option.

What is included in the programme fee?

Course material with the latest updates, online access within 48 hours, printed books shipped with your enrolment, a personal subject expert for life at no cost, the online examination and project assessment, and two international certificates on successful completion. There are no hidden charges.

Is the TopCV Coach access really free?

Yes. Every GIHS enrolment now includes complimentary TopCV Coach access worth ₹9,999 for professional resume building and interview skills, and your profile is posted on the TopCV website where a large recruiter network is active.

Can I use this programme to start my own practice or venture?

Yes, within your lawful professional scope. The Business & Entrepreneurship section of this brochure sets out the non-clinical services, education and consulting work the knowledge supports. Regulated clinical services require the appropriate qualification and authorisation.

I am not from a clinical background. Can I still enrol?

Yes. Any graduate from any discipline may enrol, as can working professionals with relevant experience, entrepreneurs and managers of healthcare or allied organisations.

No batch to wait for — start the day you enrol Admissions stay open every day of the year — enrol today and begin at once.

ABOUT THE INSTITUTE

Global Institute of Health Science

Global Institute of Health Science is a pioneer in health science education, especially in distance and online learning, with more than 15 years of experience and international exposure. GIHS is an ISO 21001:2018 certified health science institute, globally acclaimed, and certified with copyright approval from IPR, Government of India. GIHS also holds international certification from UASL UK for its Quality Control Management System.

- **Excellence for health professionals** — Programmes built around what healthcare employers actually ask for.
- **15+ years with international exposure** — A student and professional base across India, UK, USA, Canada, UAE, Russia and Australia.
- **ISO certified and government approved** — ISO 21001:2018, IPR Government of India copyright approval and UASL UK quality certification.
- **Lifetime free personalised tutoring** — A dedicated subject expert assigned to you at no cost, for life.

More Ways to Build Your Career

GIHS programmes help professionals get a strong start in the healthcare field. These courses are ad-hoc to a professional career and provide the additional benefit of being part of a global learning organisation.
