PROGRAMME OVERVIEW

Build Future-Ready Skills in Medical Transcription

Practical | Job-Oriented | Medical Terminology | Reports | EHR | Editing | Health Informatics | AI Literacy

The GIHS Medical Transcription programme builds professional knowledge and practical competency for healthcare documentation environments. It develops medical terminology, anatomy and physiology, disease-process knowledge, medical style and grammar, listening and verification skills, record-management awareness and familiarity with the medical reports used in both inpatient and outpatient settings.

The course focuses specifically on the Basic Four report types — History & Physical Examination, Consultation, Operative Report and Discharge Summary — alongside healthcare informatics, electronic medical records, clinical information systems and medical coding awareness.

> **"We Teach What the Job Requires."**
>
> Medical transcription is evolving from simple typing into technology-assisted clinical documentation, editing, proofreading, quality review and information management. This redesigned programme combines core transcription competency with future-ready AI literacy so you can adapt as the workflow changes.

Why This Programme Stands Out

- Basic to advanced medical terminology
- Anatomy, physiology and disease-process knowledge
- Medical style, grammar, punctuation and capitalisation
- Accuracy in numbers, instructions and record maintenance
- The Basic Four — H&P, Consultation, Operative and Discharge Summary
- Medical Record Department (MRD), IT and data-management concepts
- Electronic Medical Records and Health Information Systems
- HL7, PACS, DICOM, ICD-10, Cerner and health-informatics awareness
- Clinical decision-support and medical-informatics concepts
- Medical ethics, confidentiality and information governance
- NEW dedicated AI module for transcription & clinical documentation
- Certificate, PG Diploma and Fast-Track learning pathways

REVISED SYLLABUS

Curriculum, Module by Module

The full GIHS syllabus, regrouped into 8 clearly sequenced modules so you can see exactly what each stage of the programme teaches and why it comes where it does. Module 8 is the new Artificial Intelligence module.

MODULE 01 Healthcare Industry & Foundation Sciences

The setting you are documenting for, and the body knowledge that makes dictation comprehensible rather than phonetic.

- Healthcare Industry
- Anatomy & Physiology
- Disease processes
- Diagnostic Reports

MODULE 02 Medical Language & Transcription Competency

The craft itself — vocabulary, style and the disciplined accuracy that defines a good transcriptionist.

- Medical terminology from basic to advanced level
- Medical style and grammar; punctuation and capitalisation
- Listening and verbal-comprehension skills
- Accurate sorting, checking, counting and verification of numbers
- Following verbal and written instructions
- Medical-record maintenance awareness

MODULE 03 The Basic Four Report Types

Deep, format-by-format practice in the four reports that make up most transcription work.

- History & Physical Examination Reports
- Consultation Reports
- Operative Reports
- Discharge Summaries
- Proficiency across multiple specialties

MODULE 04 Medical Records & MRD Management

How a medical record is created, governed, stored and protected — on paper and electronically.

- MRD Management & IT — Data Management
- Medical Record Science and Technology — MRD benefits & risks
- Medical ethics related to MRD
- Organisation of health information — paper-based and electronic medical records

MODULE 05 Health Informatics & Standards

The standards layer that lets healthcare systems exchange information — and why it matters to a documentation professional.

- Medical / Health Informatics & goals of medical transcription
- Taxonomy of medical informatics; issues in medical informatics
- Systems design considerations for the clinical user
- Standards in medical informatics
- HL7 | PACS | DICOM | ICD-10 Coding | NHII | Cerner

MODULE 06

Clinical Information Systems

The software estate of a hospital, department by department.

- Health information systems in clinical settings
- Hospital & clinic information systems
- Laboratory and radiology information systems
- Pharmacy information systems
- Clinical IT benefits & risks; Clinical Decision Support Systems
- Issues with the Electronic Medical Record

MODULE 07

Public Health, eHealth & Emerging Technology

Where healthcare information goes beyond the single encounter — and where the field is heading.

- Public health systems — disease surveillance, chronic disease management, registries, epidemiology, health indicators and statistical reporting
- eHealth, connectivity and virtual healthcare delivery
- Clinical imaging, health finance and health insurance systems
- International health and telemedicine
- Artificial Intelligence and expert systems in medicine
- Bioinformatics, the Genome Project, quality and outcomes
- Future technologies, Personal Health Records, ethical and political issues

MODULE 08 · NEW

Artificial Intelligence in Medical Transcription & Clinical Documentation

Speech Recognition · AI-Assisted Transcription · Medical Editing · Documentation Quality

- Introduction to AI, Machine Learning, NLP and Generative AI in healthcare documentation
- Evolution from traditional dictation to speech recognition and AI-assisted documentation
- AI-assisted speech-to-text concepts for medical dictation
- … and 19 further topics — the full module is set out on page 5

The Programme at a Glance

8
Modules, including the new AI module

3 / 4 / 12
Months — Certificate, Fast Track or PG Diploma

100%
Online & distance, study at your own pace

Lifetime
Free personal expert assigned to you

MCQ + Project
Online exam plus a 30-page project

2
International certificates awarded and shipped

Every module is backed by a personal subject expert assigned to you for life at no cost — email or call whenever a topic needs explaining, and a session can be arranged around your queries.

MODULE 08 · NEW HIGHLIGHT MODULE

Artificial Intelligence in Medical Transcription & Clinical Documentation

Speech Recognition · AI-Assisted Transcription · Medical Editing · Documentation Quality

This module covers Artificial Intelligence, speech recognition, Natural Language Processing and Generative AI for modern transcription and documentation workflows. The emphasis is not on using AI to create text, but on developing the professional skill to verify, edit, correct and quality-check AI-generated medical documentation.

Key Topics Covered

- Introduction to AI, Machine Learning, NLP and Generative AI in healthcare documentation
- Evolution from traditional dictation to speech recognition and AI-assisted documentation
- AI-assisted speech-to-text concepts for medical dictation
- Ambient clinical documentation and AI-scribe concepts
- AI-assisted transcription of common medical report types
- AI support for H&P, Consultation, Operative and Discharge Summary formatting
- AI-assisted terminology recognition and abbreviation expansion
- AI support for spelling, grammar, punctuation, capitalisation and formatting
- AI-assisted medical-document editing and proofreading
- AI concepts for speaker identification and section classification
- AI-assisted extraction of diagnoses, procedures, medications and investigations
- AI support for EHR documentation and structured clinical-note workflows
- AI-assisted ICD-10 coding support — with professional verification
- AI for documentation completeness, consistency and quality checks
- AI-assisted comparison of dictation against transcribed output
- AI support for identifying missing words, contradictions and documentation gaps
- Generative AI for transcription practice cases and terminology quizzes
- Prompt engineering for transcriptionists, editors and documentation professionals
- Detecting hallucinated diagnoses, drugs, procedures, measurements or findings
- Preventing AI from inserting information never present in the source dictation
- Human-in-the-loop editing and final quality assurance
- Bias, accent recognition, background noise and specialty-terminology limitations

THE RESPONSIBLE BOUNDARY

Anyone can generate an answer with AI. The professional skill — and the one employers are now paying for — is knowing how to find what the AI got wrong.

AI assists documentation. It does not independently diagnose, prescribe or alter clinical decisions, and its output is never final until a human has verified it against the source.

What This Module Adds to Your Career

The transcription profession is increasingly shaped by speech recognition, automated documentation and AI. Future-ready professionals need skills beyond typing: medical-language expertise, source verification, editing, proofreading, quality assurance and the ability to detect AI-generated errors. This module positions you to understand both traditional transcription and emerging AI-enabled workflows — and to own the human quality-control step that automation still cannot cover.

AI-Enhanced Practice Exercises

Applied work that builds the verification habit, not just the prompting habit:

- Compare source dictation with AI-generated transcription
- Correct terminology errors and identify hallucinated details
- Edit a draft operative report to publication standard
- Review a discharge summary for omissions
- Measure and report transcription accuracy

HOW YOU STUDY & WHERE IT TAKES YOU

Study Method, Certification, Skills & Career Pathways

Study Methodology

- Freelance, self-paced method of study around your work schedule.
- Study the books and course material provided with your enrollment.
- Note down your queries as you progress through each module.
- Contact your assigned expert by email or phone at any time.
- Experts respond by mail, by call, or arrange a session based on your queries.
- Lifetime expert support to keep raising your knowledge and expertise.
- All content is based on live cases and industry best practice.

Mode of Examination

- Login details for the online examination are issued on completion of the programme duration.
- A 7-day window is given to appear for the online examination.
- The examination pattern is Multiple Choice Questions (MCQ).
- A PowerPoint project of minimum 30 pages on a topic of your own choice.
- Successful candidates are awarded two certifications (Degree and Transcriptional Degree).

Learning Mode, Assessment & Certification

Mode	Online and distance learning, designed for working professionals.
Assessment	Online and distance examinations (MCQ / theoretical) and/or projects.
Certification	GIHS certificate awarded to successful candidates on completion of applicable requirements.
Career support	Placement support and CV-forwarding assistance for successful candidates.
Verification	Employers can confirm certificate authenticity through the official GIHS verification process.

Verified by GIHS itself — not by a third party. Every certificate carries its own certificate ID. An employer, university or registration body can confirm it directly at www.gihsonline.com/verify-certification — no third-party verification agency and no fee.

Practical & Job-Oriented Learning

The programme emphasises workplace-relevant documentation skills — medical terminology, report formatting, grammar, punctuation, transcription accuracy, medical-record concepts and the healthcare information systems you will encounter in practice.

Career-Relevant Skills You Will Develop

- Medical terminology and healthcare vocabulary
- Anatomy and physiology awareness
- Medical report structure
- Transcription accuracy and verification
- Medical editing and proofreading
- Grammar, punctuation and capitalisation
- EHR and health-information-system awareness
- Medical coding and informatics fundamentals
- Healthcare data confidentiality and ethics
- AI-assisted transcription literacy
- AI-error and hallucination detection
- Quality-control and source-verification skills

Career & Professional Pathways

The current GIHS course page lists **Medical Transcriptionist, Medical Editor, Medical Proofer and Senior Medical Transcriptionist**. The programme can also support:

- Medical Transcriptionist
- Medical Editor
- Medical Proofreader / Proofer
- Senior Medical Transcriptionist
- Healthcare Documentation Support
- Speech-Recognition / AI Transcription Editor
- Medical Documentation Quality Support
- EHR / Health Information Documentation Support

Actual job titles, eligibility, responsibilities and access to patient information depend on employer requirements, experience, privacy obligations and the candidate's qualifications. Career progression also depends on typing and listening proficiency, accuracy and experience.

PLACEMENT & CAREER ENHANCEMENT

What GIHS Does for Your Career After the Course

CAREER ENHANCEMENT INCLUDED FREE WITH EVERY ENROLMENT

Exclusive FREE CV & Interview Coaching — worth ₹9,999

FREE
worth ₹9,999

Join a GIHS programme now and unlock complimentary access to TopCV Coach, giving you the professional resume and interview skills you need to launch your career with confidence. Your profile is also posted on the TopCV Coach website, where a large recruiter and employer network is active.

Professional resume building
Build a CV that reads the way recruiters in healthcare actually screen.

Interview skills coaching
Practise and sharpen how you present your qualification and your new AI literacy.

Profile posted on TopCV
Your profile goes live on topcvcoach.com, in front of a large employer network.

No extra cost
Worth ₹9,999, included free with your GIHS enrolment.

TopCV Interview — Delivered with **www.topcvcoach.com** · included free with every GIHS programme enrolment

Where Our Graduates Are Making an Impact

GIHS learners go on to contribute across healthcare and the industries that support it — in clinical services and documentation, diagnostics, public health, administration, technology and their own ventures.

Hospitals & clinics
Departmental support, documentation, quality and coordination

Diagnostic & imaging services
Technical support, workflow and reporting quality

Public health systems
Community programmes, health education and project support

Healthcare BPO & documentation
Transcription, scribing, coding and records

Healthcare IT & health-tech
Clinical systems, data services and digital health

Pharmaceutical & device companies
Medical affairs, training and field support

Insurance, TPA & claims
Medical documentation, review and coordination

NGOs & community programmes
Awareness, prevention and programme delivery

Independent practice & ventures
Education, wellness, documentation and consulting

WORKING GLOBALLY: India · UK · USA · Canada · Australia · New Zealand · UAE & Gulf · Saudi Arabia · Qatar · Oman · Russia · Germany · Ireland · Singapore · Malaysia · Africa · Europe

Placement support. More than 2,000 GIHS professionals are now working in well-known organisations worldwide, many of them after building CV and interview skills through the free TopCV Coach programme. GIHS shares your profile globally for career growth. Successful candidates receive placement support and their CVs may be forwarded to various organisations. Final employment remains subject to employer selection and role-specific eligibility.

Business & Entrepreneurship Value

Speech recognition has not removed the need for medical documentation work — it has shifted it towards editing, verification and quality control, which is work a small independent practice can take on.

- Start a medical transcription, editing and proofreading service
- Offer speech-recognition editing and documentation QC to healthcare providers
- Build a freelance or team-based healthcare documentation practice
- Provide terminology, style and documentation-quality training to other transcriptionists

Any regulated clinical service must only be provided within your lawful professional scope and applicable registration requirements. Career titles, eligibility and the right to practise depend on your prior qualification, experience, employer criteria and local regulation.

Global Institute Of Health Science

Certificate

OF POST GRADUATE DIPLOMA

This is to certify that

CANDIDATE NAME

has successfully completed the one year programme of **Post Graduate Diploma in Medical Transcription** offered by Global Institute of Health Science, during **MONTH YEAR to MONTH YEAR**. Upon successful completion of the programme

POST GRADUATE DIPLOMA

IN

MEDICAL TRANSCRIPTION

is awarded to him/her this day the **XX MONTH YEAR**.

ENROLMENT

Three Flexible Learning Options

Programme	Duration	Indian Fee	International	Positioning
Certificate Program	3 Months	**₹22,999**	**450 USD**	Basic foundation programme — core knowledge first
Post Graduate Diploma Program	1 Year	**₹32,999**	**699 USD**	Advanced and career-oriented — full depth at a steady pace
Fast Track PG Diploma Program MOST CHOSEN	4 Months	**₹36,999**	**750 USD**	Same advanced syllabus — flexible, finish at your own pace

Both advanced options carry the same career-oriented syllabus and the same two international certificates. The Fast Track is simply flexible — finish as quickly as your own pace allows and step into a fast-growing job market sooner. The Certificate Program is the basic, foundation-level option.

Printed books are optional
Online study material is included with every enrolment. Add the printed books at enrolment if you would like them shipped.

₹2,999 additional (India) | **99 USD** additional (International)

EMI available on credit cards Convert your fee into easy monthly instalments — ask admissions when you enrol.

All modes of payment are available. Fees may be subject to applicable taxes, exchange rates or future revision.

What Our Candidates Say

★★★★★ 300+ Google reviews

"I recently completed my Post Graduation in Pregnancy and Child Care from GIHS and it was a wonderful experience."
Dr Fatema Ebrahim

"One of the best institutions... Course is carefully structured and detailed. Management is very well organised and prompt in assistance."
A V

"This course has been a game-changer for me, providing the knowledge and skills necessary to succeed on a global platform."
Akram Sabiq

"They have a very good independent study methodology and the subject matter is really good... the Institute of Health was a wise choice."
Andrea Del Pilar

"From the day 1 to till date Chethan assisted very well... the studies are very detailed and made interesting."
Sarah Lilly, MBA

Admission Procedure START ANY DAY

1. **Apply online — any day**
   Enrol at www.gihsonline.com / Apply Online. Admissions stay open all year — no batch to wait for.
2. **Confirm your fee**
   No hidden charges. Payment within 7 days of enrollment.
3. **Receive your study material**
   Online access within 48 hours; printed books shipped if you add them.
4. **Get your personal expert**
   A professional subject expert is assigned to you for lifetime support at no cost.
5. **Complete exam and project**
   Online examination plus a project submission.
6. **Receive your certificates**
   Two international certificates are awarded and shipped.

Who Can Enrol

LISTED ON THE GIHS COURSE PAGE

- Science Graduates
- MBBS / BDS / BHMS / BAMS / BPT / BUMS
- B.Pharm / M.Pharm / Pharmacy Professionals
- Occupational Therapists
- B.Sc. / M.Sc. Graduates
- Life-Science Professionals
- Medical IT Professionals
- Medical Laboratory Professionals
- Nursing Professionals
- Microbiology Professionals
- Biomedical / Biotechnology Professionals
- Professionals working with hospitals & healthcare organisations

ALSO OPEN TO

- Any graduate from any discipline
- Working professionals with relevant work experience
- Entrepreneurs planning to start a healthcare or allied venture
- Managers and administrators running a healthcare organisation

Any graduate, and any professional with relevant work experience, may enrol — including those who intend to start, run or manage a healthcare or allied organisation.

QUESTIONS

Frequently Asked Questions

Will AI completely replace medical transcriptionists?

Automation is changing the role, but medical-language expertise, source verification, contextual understanding, editing and quality assurance remain essential because AI can make clinically significant errors.

Can AI make mistakes in medical transcription?

Yes. AI can mishear terminology, confuse medications or measurements, omit information or generate details that were never dictated. Human verification is a major focus of the module.

What is an AI hallucination in medical documentation?

Unsupported information generated by an AI system — for example a diagnosis, medication, procedure or finding that was not present in the source material.

Which medical reports are emphasised?

History & Physical Examination, Consultation, Operative Report and Discharge Summary — the Basic Four.

Does it cover HL7, PACS and DICOM?

Yes. HL7, PACS, DICOM, ICD-10, NHII and Cerner are all in the syllabus.

Does the existing GIHS syllabus already mention AI?

Yes — Artificial Intelligence in Medicine and Expert Systems in Medicine appear within clinical decision-making. The new module expands AI specifically for transcription workflows.

Can the AI module help with medical-editor roles?

It strengthens reviewing speech-recognition output, terminology correction, source verification, proofreading and documentation quality — all editing-oriented competencies.

Can I choose Fast-Track mode?

Yes. A 4-month Fast Track PG Diploma is offered alongside the 3-month Certificate and 1-year PG Diploma.

What is included in the programme fee?

Course material with the latest updates, online access within 48 hours, printed books shipped with your enrolment, a personal subject expert for life at no cost, the online examination and project assessment, and two international certificates on successful completion. There are no hidden charges.

Is the TopCV Coach access really free?

Yes. Every GIHS enrolment now includes complimentary TopCV Coach access worth ₹9,999 for professional resume building and interview skills, and your profile is posted on the TopCV website where a large recruiter network is active.

Can I use this programme to start my own practice or venture?

Yes, within your lawful professional scope. The Business & Entrepreneurship section of this brochure sets out the non-clinical services, education and consulting work the knowledge supports. Regulated clinical services require the appropriate qualification and authorisation.

I am not from a clinical background. Can I still enrol?

Yes. Any graduate from any discipline may enrol, as can working professionals with relevant experience, entrepreneurs and managers of healthcare or allied organisations.

No batch to wait for — start the day you enrol Admissions stay open every day of the year — enrol today and begin at once.

ABOUT THE INSTITUTE

Global Institute of Health Science

Global Institute of Health Science is a pioneer in health science education, especially in distance and online learning, with more than 15 years of experience and international exposure. GIHS is an ISO 21001:2018 certified health science institute, globally acclaimed, and certified with copyright approval from IPR, Government of India. GIHS also holds international certification from UASL UK for its Quality Control Management System.

- **Excellence for health professionals** — Programmes built around what healthcare employers actually ask for.
- **15+ years with international exposure** — A student and professional base across India, UK, USA, Canada, UAE, Russia and Australia.
- **ISO certified and government approved** — ISO 21001:2018, IPR Government of India copyright approval and UASL UK quality certification.
- **Lifetime free personalised tutoring** — A dedicated subject expert assigned to you at no cost, for life.

More Ways to Build Your Career

GIHS programmes help professionals get a strong start in the healthcare field. These courses are ad-hoc to a professional career and provide the additional benefit of being part of a global learning organisation.

Health Management Programs

- Health Informatics
- Hospital Administration
- Pharma Management
- Hospital Planning & Management
- Medical Transcription
- Nursing Management
- Public Health Administration
- Health Insurance
- Blood Banking Management
- Medico-Legal Systems
- Medical Laboratory Technology
- Medical Radiology Technology
